

KUKA

Accelerate to the max.

KUKA COASTER.

KUKA COASTER

THE EXCITEMENT, THE THRILL OF THREE-DIMENSIONAL MOTION IN SPACE. COMPARABLE TO RIDING A ROLLERCOASTER – BUT WAY MORE SURPRISING AND SIGNIFICANTLY MORE FLEXIBLE.

Nothing lets the passengers know where the KUKA Coaster will move next and what the next surprise will be. Pure excitement awaits the passengers thanks to five programs – ranging from “gentle” to “extreme” – that allow them to choose a personalized thrill experience. A sharp left turn, hanging upside down, gentle swinging, or rocketing to the skies. With mobility in six axes, the KUKA Coaster can move its two-seat gondola freely in space and create a unique, three-dimensional ride experience. For easy access, floor-level entry without an access platform or stairs can also be set up. The structural changes on site are thus limited to the essential technical elements.

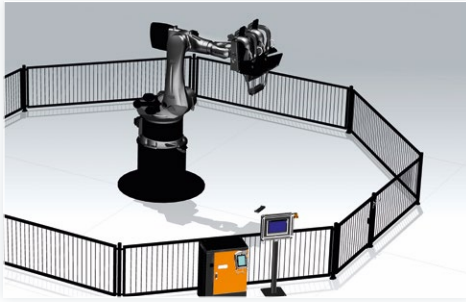

Surrounded by an appropriately themed setting and reinforced by breathtaking sound and light effects, the KUKA Coaster packs all of the necessary attributes into a minimum amount of space to become a star attraction in the media and a magnet for visitors – whether in theme parks, family entertainment centers (FECs) or large amusement parks. Numerous KUKA Coaster attractions demonstrate this every day – across the globe.

To find out more about the KUKA Coaster, scan this QR code with your smartphone or visit www.kuka-entertainment.com

SAFETY AND QUALITY. For all the dynamic motion and coaster fun, it is reassuring to know that the KUKA Coaster is licensed to carry passengers, being certified by the German technical inspectorate TÜV as conforming to 13814 (DIN 4112). Its structural components and gear units are 100% certified for this type of action. Mechanical stops and continuous electronic monitoring ensure maximum safety. The use of intuitively understandable graphics on the large touch panel also enable easy and safe operation of the system.

KUKA – YOUR STRONG PARTNER.

Quality made German robots built with the utmost commitment to our customer's needs. KUKA has been the basis for decades of exceptional technology helping companies to achieve process optimization. We were the pioneers in the world of robotics, and now are global leader in innovation. Our passion is finding future-oriented solutions to make even complex automation tasks simple. Whatever your application no matter the difficulty you can implement it with KUKA. Thanks to experienced KUKA system partners we are able to provide robotic solutions industry-wide. We strive to turn your ideas into reality. Use our experience to drive your success.
